## How to Use this Report

### Discovering Diversity Profile® Group Report

The *Discovering Diversity Profile*® Group Report will help focus diversity efforts based on the needs of the group or organization.

The information in this report moves through the four key areas of diversity: **Knowledge, Understanding, Acceptance, and Behavior**. Each area is important in shaping attitudes toward diversity.

**Knowledge** is the foundation for all the other areas. Information about other people is necessary before we can understand someone else's feelings, thoughts, and motives. Only then can we begin to know how our own feelings, thoughts, and motives impact others. **(Pages 4-5)**

**Understanding** builds upon our knowledge base. Understanding is the intellectual recognition that we are the way we are because of our cultural backgrounds and influences. **(Pages 6-7)**

**Acceptance** is an expression of the feelings we develop about ourselves and about diverse groups. Some level of understanding must come before achieving any genuine acceptance of other people. This is particularly true for those with different physical abilities, customs, values, or sexual orientation. **(Pages 8-9)**

**Behavior** refers to the ability to interact with different people. It indicates our ability to perform tasks with comfort and ease in our interactions with people who are different from us. **(Pages 10-11)**

On the next page you will find the **Group Diversity Comfort Level Grid**, which provides a snapshot of your group in the four key areas of diversity development. On the pages following the Group Diversity Comfort Level Grid, group level data for all of the items in the diversity profile are displayed. The group level data includes information on how the group responded to each item, the mean score for each item, and the Group Comfort Level for each category. You may choose to focus on the items with the lowest means in order to better focus your efforts on the greatest needs of the group as a whole.

**Please note that all information in this report is anonymous. It does not reveal individual scores or item responses.**

## Group Diversity Comfort Level Grid

### Discovering Diversity Profile® Group Report

The Group Diversity Comfort Level Grid pictured below provides a snapshot of your group in the four key areas of diversity development. Your Group Mean shows the average score for your group in each category as well as your group's comfort level, ranging from Level 1 (lowest) to Level 3 (highest).

## Knowledge: Stereotypes

### Discovering Diversity Profile® Group Report

Your group mean for Stereotypes is 32.1, which is in Level 3. On the average, this group appears likely to respond to co-workers with appropriate regard for their cultural background. They seem to make few incorrect assumptions about diverse groups based on fixed or generalized impressions of others. They may begin to use this as an opportunity to engage in a rich conversation about stereotypes and their impact on the workplace team's performance.

Below are the group level data for each of the items in the Stereotypes area of the *Discovering Diversity Profile*®. The table includes:

- A key that shows in which direction the item is scored (D = Disagree, A = Agree). For all items in this section, disagreement suggests higher levels of diversity knowledge; agreement suggests lower levels of diversity knowledge.
- The percentage of the group's responses at each level of the rating.
- The mean (or average) score for the group. A lower mean suggests the specific areas where this group may want to focus their diversity work.

Item	Key	Strongly Disagree	Disagree	Agree	Strongly Agree	Mean
